Sir:

CURITEL COMMUNICATIONS INC., the Assignee of record of the entire right, title and interest in and to the above-identified application by virtue of an Assignment recorded on November 9, 2000, at Reel 011247, Frame 0458, an Assignment recorded on August 18, 2003, at Reel 014386, Frame 0905, and an Assignment recorded on April 5, 2004, at Reel 015185, Frame 0457, for Patent Application Serial No.

09/564,961, now United States Patent No. 6,741,868,<sup>1</sup> hereby waives and disclaims the terminal portion of the term of any patent to be granted on the above-identified application subsequent to the expiration date of United States Patent No. 6,741,868, whereby any patent to be granted on the above-identified application and United States Patent No. 6,741,868 will expire on the same day, provided any patent granted on the above-identified application shall be enforceable only for and during such period that said patent is commonly owned with United States Patent No. 6,741,868.

CURITEL COMMUNICATIONS INC., the Assignee of record of the entire right, title and interest in and to the above-identified application, and the Assignee of record of Application Serial No. 10/825,281 and Application Serial No. 10/824,929,<sup>2</sup> hereby further waives and disclaims the terminal portion of the term of any patent to be granted on the above-identified application subsequent to the expiration date of any patent granted on Application Serial No. 10/825,281 or Application Serial No. 10/824,929, whereby any patent to be granted on the above-identified application and Application Serial No. 10/825,281 or Application Serial No. 10/824,929 will expire on the same day, provided any patent granted on the above-identified application shall be enforceable only for and during such period that said patent is commonly owned with any patent granted on Application Serial No. 10/825,281 or Application Serial No. 10/824,929.

<sup>1</sup> The above-identified application was filed on April 15, 2004 and is a continuation of Patent Application Serial No. 09/564,961, now U.S. Patent No. 6,741,868. Because the Assignment to Curitel of Application Serial No. 09/564,961 was recorded on April 5, 2004, such Assignment also applies to the above-identified application. See MPEP § 306 (8th ed., 3rd rev. 2004).

<sup>2</sup> Application Ser. No. 10/825,281 and Application Serial No. 10/824,929 are both continuations of Application Serial No. 09/564,961, now U.S. Patent No. 6,741,868, and were both filed on April 15, 2004. Because the Assignment to Curitel of Application Serial No. 09/564,961 was recorded on April 5, 2004, such Assignment also applies to Application Ser. No. 10/825,281 and Application Serial No. 10/824,929.

Dated: August 10, 2005

Respectfully submitted,
